

AVaaS

# Antivirus as a Service

*Cyber criminals are getting smarter and it's  
time you stay one step ahead.*

## Treat Yourself to Better Protection

Let's face it. There's an increasing number of bad actors working hard to identify and target vulnerable organizations. Becoming a victim of these attacks can cost you downtime, capital, and even your reputation. Simply 'checking the box' with a generic solution is no longer an acceptable means of protection.

### What is AVaaS?

With our Antivirus as a Service (AVaaS) solution, companies can reduce valuable time spent on managing an antivirus system. Our service combines management from highly certified security engineers with world-class artificial intelligence (AI) based antivirus protection.

### What's Included?

- ✓ Configuration and management of the AV solution
- ✓ Evaluation of all executable code on devices during the onboarding process, providing detailed reporting on risks associated with any malicious software
- ✓ SOC monitoring and alerting on certain triggers
- ✓ Dedicated/Unlimited access to HPN support desk for covered services
- ✓ Overnight Priority 1 issues; Priority 2-4 issues handled next business day
- ✓ Software updates

### Benefits of AVaaS

- ✓ AI-based malware prevention and machine learning
- ✓ Pre-execution blocking and quarantining of known and unknown threats
- ✓ Active detection and prevention of zero day attacks
- ✓ Proactive management, monitoring, and alerting by certified HPN security engineers
- ✓ Ongoing maintenance of best practice configuration and policies
- ✓ Customized policies and rules to minimize business disruption
- ✓ Script management controlling where, how, and when scripts are allowed
- ✓ Protection against unauthorized devices, such as an unknown USB, from accessing the network
- ✓ Regular scheduled console reviews
- ✓ Root cause analysis and threat hunting capability
- ✓ Affordable monthly cost with minimal upfront investment
