

ESaaS

Email Security as a Service

Email is a crucial piece of everyday communication

Email Security as a Service (ESaaS) with High Point Networks reduces the complexity of protecting your employees from spearphishing, malware, data leaks, data loss, and downtime. Meticulously configured by our certified engineers, ESaaS will dramatically cut down on the spam your end users see and help ensure only the most trustworthy content is delivered to their inbox. ESaaS provides you with peace of mind and the tools to take full advantage of the latest in spam/email protection technology. Features include URL sandboxing, attachment scanning, spoof protection and more, all delivered as a 100% cloud-based service.

Why ESaaS?

Preventative Action

- Proactively identifying and alerting on risky, 'click happy' users within your network
- See once, prevent for all – Global changes made across customer base when threats are identified
- Reporting and visibility into email trends and data that affects your users

Peace of Mind

- Proactive maintenance and management of your email security by HPN certified engineers in our NOC
- Unlimited access to HPN support desk for any requests involving your email security best practices
- Avoid frustrating SLA's and costs of direct manufacturer support

Time Saver

- Enjoy a customized and proven onboarding process balancing ease and HPN security best practices
- Keep focus on critical business applications while leaving your email security in expert hands
- Configure and manage user sync and management to automatically add/remove users
