

VOICE+™

POWERED BY  Microsoft Teams

Enhance Your Communications

Harness the power of Microsoft Teams by adding voice calling features, PSTN access, and a concierge service that includes configuration and ongoing maintenance and support to your communications.

What is VOICE+?

Powered by Microsoft Teams, organizations can transition from a traditional phone system to a fully integrated cloud-based solution by leveraging their existing M365 investment.

VOICE+ provides the ability to integrate Outlook contacts, instant message, make/take outbound calls, and collaborate with anyone from anywhere on any connected device.

VOICE+ Highlights

- Bundled options to accommodate your deployment needs
- Remove back-end data center devices along with their liability and maintenance
- Ability to keep your carrier if you're locked in to a prior contract
- Conveniently host voice & collaboration solutions on a single platform... finally

Cloud-Based Phone System

Connect & collaborate on any device from anywhere at anytime.

Highly Secure Voice Solution

Arguably the most secure platform available, VOICE+ buttons up your network access and implements a safe and reliable solution.

HPN's Concierge Support Service

Polish your voice deployment by having High Point Networks fully maintain and support your communications throughout your contract.

Connect to The World

Experience exceptional voice quality, number portability, and affordable long distance.
